

List of invited sessions

Session No.	Topic	Organizer
1	<i>Analysis and modelling environmental extremes</i>	D. Walshaw
2	<i>Analysis of environmental duration data</i>	J. Picek
3	<i>Analysis of extremes</i>	J. M. Angulo
4	<i>Computational biology</i>	J. Hřebíček
5	<i>Computer intensive methods and computational problems for environmental statistics</i>	A. Fasso
6	<i>Environmental monitoring</i>	J. Antoch
7 I	<i>Geostatistics under the perspective of non-statisticians</i>	D. Cocchi
7 II	<i>Geostatistics under the perspective of non-statisticians</i>	D. Cocchi
8 I	<i>Geostatistics under the perspective of statisticians</i>	D. Cocchi
8 II	<i>Geostatistics under the perspective of statisticians</i>	D. Cocchi
9	<i>Recent advances in spatial modelling and data analysis</i>	H. Zhang
10 I	<i>Robust statistics</i>	R. Dutter
10 II	<i>Robust statistics</i>	R. Dutter
11	<i>Spatial epidemiology</i>	T. Yanagawa
12	<i>Spatio-temporal models to estimate disease risk</i>	L. Ugarte
13	<i>Trends in environmental factors</i>	V. K. Jandhyala
14 I	<i>Environmental and human risk assessment</i>	J. Dušek, I. Holoubek
14 II	<i>Environmental and human risk assessment</i>	A. El-Shaarawi
15	<i>Software for environmental data processing</i>	S. Andrews
